Corson Rubber Products, Inc. was founded in 1939. We specialize in custom molded and extruded rubber products.

KNOBBY MAT™

**USED EXTENSIVELY ON UTILITY CARTS,
WORKBENCHS,
AND SHELIVING
FDA COMPLIANT**

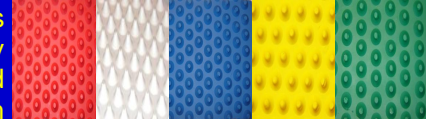

STANDARD SIZES

21" X 27"

18" X 25"

21" X 21"

KNOBBY MAT™ is compliant with the U.S. Food and Drug Administration (FDA), Title 21, CFR 177.2600 - "Rubber Articles Intended for Repeated Use". The patented "knobby" design allows free air flow around machine parts and helps prevent bacterial growth and provides a very effective non-skid surface. These FDA compliant mats are designed specifically for use in food processing facilities, dairy operations, bottling companies, and restaurants throughout the North America. Our mat material is specifically compounded to withstand aggressive commercial cleaning processes. These mats are durable and will last for years in your operation.

KNOBBY MAT™ is currently available in Red, White, Blue, Green, and Yellow. All these colors are FDA compliant. Our Black mat which is not FDA compliant is used in many facilities strictly as anti-fatigue. We continue to develop new colors and will customize our mat colors to fit your particular requirements.

CUSTOM MOLDED PRODUCTS

We offer custom molding capabilities in press sizes ranging from 300 ton 24 X 24+ to 600 ton 36+x 36+presses.

Our molded products group serves over 300 companies world wide to broad range of domestic and international manufacturers and distributors. Materials used in our molding process include Nitrile, Silicone, EPDM, SBR and Neoprene.

CUSTOM EXTRUDED PRODUCTS

We manufacture Extruded Rubber Profiles in sizes ranging from .095" diameter to a cross section of up to 12". We can cut to length, splice and vulcanize, or run your extrusion in continuous lengths. We also extrude, cut to length and vulcanize gaskets and seals of all shapes and sizes. Our extrusions cover the full range of rubber polymers and we also extrude closed cell sponge. Our extrusions can be either solid or in tubular form and are manufactured in a variety of colors and materials including clear vinyl, EPDM, Neoprene, Silicone, Santoprene, Polyisoprene, Nitrile as well as closed cell EPDM and Neoprene sponge.
